Chapter 1

Namespace Index

1.1 Namespace List

Here is a list of all documented namespaces with brief descriptions:

PokeWeb	7
PokeWeb.Controllers	7
PokeWeb.DAL	7
PokeWeb.Migrations	7
PokeWeb.Models	7

Chapter 2

Hierarchical Index

2.1 Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

PokeWeb.Models.Ability	9
ApiController	
PokeWeb.Controllers.pokemonController	14
DbContext	
PokeWeb.DAL.PokeWebContext	17
DbMigration	
PokeWeb.Migrations.CreateDatabase	10
HttpApplication	
PokeWeb.WebApiApplication	21
IMigrationMetadata	
PokeWeb.Migrations.CreateDatabase	10
PokeWeb.Models.Move	11
PokeWeb.Models.Pokemon	11
PokeWeb.Models.Statistic	18
PokeWeb.Models.StatisticContainer	20
PokeWeb.SwaggerConfig	20

Chapter 3

Class Index

3.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

PokeWeb.Models.Ability	9
PokeWeb.Migrations.CreateDatabase	10
PokeWeb.Models.Move	11
PokeWeb.Models.Pokemon	11
PokeWeb.Controllers.pokemonController	14
PokeWeb.DAL.PokeWebContext	17
PokeWeb.Models.Statistic	18
PokeWeb.Models.StatisticContainer	20
PokeWeb.SwaggerConfig	20
PokeWeb.WebApiApplication	21

Chapter 4

Chapter 5

Class Documentation

5.1 PokeWeb.Models.Ability Class Reference

Properties

- long `id` [get, set]
- string `name` [get, set]

5.1.1 Detailed Description

`Ability` class represents the `Pokemon` ability object. This object is grouped in list form and related to a `Pokemon`

5.1.2 Property Documentation

5.1.2.1 `id`

```
long PokeWeb.Models.Ability.id [get], [set]
```

An identification element.

5.1.2.2 `name`

```
string PokeWeb.Models.Ability.name [get], [set]
```

A name of ability.

The documentation for this class was generated from the following file:

- Models/Ability.cs

5.2 PokeWeb.Migrations.CreateDatabase Class Reference

Inheritance diagram for PokeWeb.Migrations.CreateDatabase:

Public Member Functions

- override void [Up](#) ()
- override void [Down](#) ()

5.2.1 Detailed Description

Class to create/update database. This class was created for the "add-migrations" command in the Package Manager Console after deployment and generated the database flow to create and/or update the database structure. At each project update this command must be executed and a new "DbMigration" is created.

5.2.2 Member Function Documentation

5.2.2.1 Down()

```
override void PokeWeb.Migrations.CreateDatabase.Down ( ) [inline]
```

Routine to delete tables. This routine is responsible for delete the tables in the database, mirroring the most recent structure of the objects in the project.

5.2.2.2 Up()

```
override void PokeWeb.Migrations.CreateDatabase.Up ( ) [inline]
```

Routine to create tables. This routine is responsible for creating or updating the tables in the database, mirroring the most recent structure of the objects in the project.

The documentation for this class was generated from the following files:

- Migrations/201801261158053_CreateDatabase.cs
- Migrations/201801261158053_CreateDatabase.Designer.cs

5.3 PokeWeb.Models.Move Class Reference

Properties

- long [id](#) [get, set]
- string [name](#) [get, set]

5.3.1 Detailed Description

[Move](#) class represents the [Pokemon](#) move object. This object is grouped in list form and related to a [Pokemon](#)

5.3.2 Property Documentation

5.3.2.1 id

```
long PokeWeb.Models.Move.id [get], [set]
```

An identification element.

5.3.2.2 name

```
string PokeWeb.Models.Move.name [get], [set]
```

A name of ability.

The documentation for this class was generated from the following file:

- Models/Move.cs

5.4 PokeWeb.Models.Pokemon Class Reference

Properties

- long [id](#) [get, set]
- string [name](#) [get, set]
- string [image](#) [get, set]
- int [speed](#) [get, set]
- int [defense](#) [get, set]
- int [attack](#) [get, set]
- int [special_defense](#) [get, set]
- int [special_attack](#) [get, set]
- int [hp](#) [get, set]
- int [base_experience](#) [get, set]
- int [height](#) [get, set]
- int [weigh](#) [get, set]
- virtual ICollection< [Move](#) > [moves](#) [get, set]
- virtual ICollection< [Ability](#) > [abilities](#) [get, set]

5.4.1 Detailed Description

[Pokemon](#) class represents the [Pokemon](#) in all project. This object contain all information about the [Pokemon](#)

5.4.2 Property Documentation

5.4.2.1 abilities

```
virtual ICollection<Ability> PokeWeb.Models.Pokemon.abilities [get], [set]
```

A list of abilities of the [Pokemon](#).

5.4.2.2 attack

```
int PokeWeb.Models.Pokemon.attack [get], [set]
```

A attack attribute of the [Pokemon](#).

5.4.2.3 base_experience

```
int PokeWeb.Models.Pokemon.base_experience [get], [set]
```

A experience points attribute of the [Pokemon](#).

5.4.2.4 defense

```
int PokeWeb.Models.Pokemon.defense [get], [set]
```

A defence attribute of the [Pokemon](#).

5.4.2.5 height

```
int PokeWeb.Models.Pokemon.height [get], [set]
```

A height attribute of the [Pokemon](#).

5.4.2.6 hp

```
int PokeWeb.Models.Pokemon.hp [get], [set]
```

A health points attribute of the [Pokemon](#).

5.4.2.7 id

```
long PokeWeb.Models.Pokemon.id [get], [set]
```

An identification element.

5.4.2.8 image

```
string PokeWeb.Models.Pokemon.image [get], [set]
```

A path to [Pokemon](#) image.

5.4.2.9 moves

```
virtual ICollection<Move> PokeWeb.Models.Pokemon.moves [get], [set]
```

A list of moves of the [Pokemon](#).

5.4.2.10 name

```
string PokeWeb.Models.Pokemon.name [get], [set]
```

A name of [Pokemon](#).

5.4.2.11 special_attack

```
int PokeWeb.Models.Pokemon.special_attack [get], [set]
```

A special attack attribute of the [Pokemon](#).

5.4.2.12 special_defense

```
int PokeWeb.Models.Pokemon.special_defense [get], [set]
```

A special defence attribute of the [Pokemon](#).

5.4.2.13 speed

```
int PokeWeb.Models.Pokemon.speed [get], [set]
```

A speed attribute of the [Pokemon](#).

5.4.2.14 weigh

```
int PokeWeb.Models.Pokemon.weigh [get], [set]
```

A weigh attribute of the [Pokemon](#).

The documentation for this class was generated from the following file:

- Models/Pokemon.cs

5.5 PokeWeb.Controllers.pokemonController Class Reference

Inheritance diagram for PokeWeb.Controllers.pokemonController:

Public Member Functions

- IActionResult [GetAllPokemons](#) (int page_size, int page)
- IActionResult [GetFirst6PokemonsOrderByAttackDesc](#) ()
- IActionResult [GetPokemon](#) (int id)
- IActionResult [PostPokemon](#) ([Pokemon](#) pokemon)
- IActionResult [PutPokemon](#) ([Pokemon](#) pokemon)
- IActionResult [PatchPokemon](#) ([Pokemon](#) pokemon)
- IActionResult [DeletePokemon](#) (int id)

5.5.1 Detailed Description

Primary controller of the API application. This controller is responsible for receiving all requests in the application and handling each of the calls according to the route and parameters received.

5.5.2 Member Function Documentation

5.5.2.1 DeletePokemon()

```
IActionResult PokeWeb.Controllers.pokemonController.DeletePokemon (
    int id ) [inline]
```

Routine to delete a Pokemon. This routine is responsible for remove data about the Pokemon into the application with identification

Parameters

<i>Pokemon</i>	Identification of Pokemon in database
----------------	---------------------------------------

Returns

Data of Pokemon removed

Author

Rafael M. S. Siqueira

5.5.2.2 GetAllPokemons()

```
IHttpActionResult PokeWeb.Controllers.pokemonController.GetAllPokemons (
    int page_size,
    int page ) [inline]
```

Routine for Pokemon listings. This routine operates by paging system, facilitating the client-side implementation. To be executed, this routine waits for two parameters, the page size (number of elements returned) and the page number.

Parameters

<i>page_size</i>	Number of elements
<i>page</i>	Number of page

Returns

List of Pokemons

Author

Rafael M. S. Siqueira

5.5.2.3 GetFirst6PokemonsOrderByAttackDesc()

```
IHttpActionResult PokeWeb.Controllers.pokemonController.GetFirst6PokemonsOrderByAttackDesc ( )
[inline]
```

Routine for the list of 6 best Pokemons ordered by attack points. This routine lists the 6 best pokémons ordered by the attack parameter and calculates the statistical data for this group to help the client about this information.

Returns

Container with the list of 6 top Pokemons and statistic data

Author

Rafael M. S. Siqueira

5.5.2.4 GetPokemon()

```
IHttpActionResult PokeWeb.Controllers.pokemonController.GetPokemon (
    int id ) [inline]
```

Routine for Pokemon details. This Pokemon gets the identification number of a Pokemon and returns all the data in the application related to that Pokemon

Parameters

<i>id</i>	Identification of Pokemon in database
-----------	---------------------------------------

Returns

Data of Pokemon

Author

Rafael M. S. Siqueira

5.5.2.5 PatchPokemon()

```
IHttpActionResult PokeWeb.Controllers.pokemonController.PatchPokemon (
    Pokemon pokemon ) [inline]
```

Routine to send a Pokemon. This routine is responsible for update a part of information about the Pokemon into the application in database

Parameters

<i>Pokemon</i>	Part of information about the Pokemon
----------------	---------------------------------------

Returns

Data of Pokemon with identification

Author

Rafael M. S. Siqueira

5.5.2.6 PostPokemon()

```
IHttpActionResult PokeWeb.Controllers.pokemonController.PostPokemon (
    Pokemon pokemon ) [inline]
```

Routine to send a Pokemon. This routine is responsible for inserting a Pokemon into the application or updating all the data if it is already registered in the database of the application

Parameters

<i>Pokemon</i>	All infoirmation about the Pokemon
----------------	------------------------------------

Returns

Data of Pokemon with identification

Author

Rafael M. S. Siqueira

5.5.2.7 PutPokemon()

```
IHttpActionResult PokeWeb.Controllers.pokemonController.PutPokemon (  
    Pokemon pokemon ) [inline]
```

Routine to send a Pokemon. This routine is responsible for inserting a Pokemon into the application all the data if it is already registered in the database of the application

Parameters

<i>Pokemon</i>	All infoirmation about the Pokemon
----------------	------------------------------------

Returns

Data of Pokemon with identification

Author

Rafael M. S. Siqueira

The documentation for this class was generated from the following file:

- Controllers/pokemonController.cs

5.6 PokeWeb.DAL.PokeWebContext Class Reference

Inheritance diagram for PokeWeb.DAL.PokeWebContext:

Public Member Functions

- [PokeWebContext](#) ()

Properties

- `DbSet< Models.Pokemon > Pokemons` [get, set]

5.6.1 Detailed Description

Class of context database. This class is user for EntityFramework an extend "DbContext" to manage the access of database with MySQL Server 2014.

5.6.2 Constructor & Destructor Documentation

5.6.2.1 [PokeWebContext](#)()

```
PokeWeb.DAL.PokeWebContext.PokeWebContext ( ) [inline]
```

Constructor of database context. This contriuctor mapping access data informatio this TAG "PokeWebContext" in "Web.config" file.

5.6.3 Property Documentation

5.6.3.1 [Pokemons](#)

```
DbSet<Models.Pokemon> PokeWeb.DAL.PokeWebContext.Pokemons [get], [set]
```

Dataset to map object Pokemon in database. This used with Entity Framework to generate all resources with percistence using MySQL Server 2014.

The documentation for this class was generated from the following file:

- DAL/PokeWebContext.cs

5.7 [PokeWeb.Models.Statistic](#) Class Reference

Properties

- `int speed` [get, set]
- `int defense` [get, set]
- `int attack` [get, set]
- `int special_defense` [get, set]
- `int special_attack` [get, set]
- `int hp` [get, set]

5.7.1 Detailed Description

[Statistic](#) class represents the [Pokemon](#) sum attributes. This object is created where client request the 6 top attacks points Pokemons

5.7.2 Property Documentation

5.7.2.1 attack

```
int PokeWeb.Models.Statistic.attack [get], [set]
```

A attack attribute sum of the [Pokemon](#).

5.7.2.2 defense

```
int PokeWeb.Models.Statistic.defense [get], [set]
```

A defence attribute sum of the [Pokemon](#).

5.7.2.3 hp

```
int PokeWeb.Models.Statistic.hp [get], [set]
```

A speed health points sum of the [Pokemon](#).

5.7.2.4 special_attack

```
int PokeWeb.Models.Statistic.special_attack [get], [set]
```

A special attack attribute sum of the [Pokemon](#).

5.7.2.5 special_defense

```
int PokeWeb.Models.Statistic.special_defense [get], [set]
```

A special defence attribute sum of the [Pokemon](#).

5.7.2.6 speed

```
int PokeWeb.Models.Statistic.speed [get], [set]
```

A speed attribute sum of the [Pokemon](#).

The documentation for this class was generated from the following file:

- Models/Statistic.cs

5.8 PokeWeb.Models.StatisticContainer Class Reference

Properties

- `IList< Pokemon > pokemons` [get, set]
- `Statistic statistic` [get, set]

5.8.1 Detailed Description

[StatisticContainer](#) class represents the list of top 6 Pokemons and statistics data. This object is created where client request the 6 top attacks points Pokemons and used to return the statistic data and the list of top 6 Pokemons

5.8.2 Property Documentation

5.8.2.1 pokemons

```
IList<Pokemon> PokeWeb.Models.StatisticContainer.pokemons [get], [set]
```

List of 6 top attack attribute Pokemons

5.8.2.2 statistic

```
Statistic PokeWeb.Models.StatisticContainer.statistic [get], [set]
```

[Statistic](#) data about this group of Pokemons

The documentation for this class was generated from the following file:

- Models/Statistic.cs

5.9 PokeWeb.SwaggerConfig Class Reference

Static Public Member Functions

- static void **Register** ()

The documentation for this class was generated from the following file:

- App_Start/SwaggerConfig.cs

5.10 PokeWeb.WebApiApplication Class Reference

Inheritance diagram for PokeWeb.WebApiApplication:

Protected Member Functions

- void **Application_Start** ()

The documentation for this class was generated from the following file:

- Global.asax.cs
